GENERAL

DURABILITY :

This product offers exceptional resistance to water, dirt, abrasion, UV rays and wear (yellowing, crackling, scaling, delamination).

MAINTENANCE :

For daily care and maintenance of the film use only neutral pH detergents, do not use products with too much acidic or basic pH.

- Hot water (not boiling) can help eliminate stubborn stains
- In some cases, even a solution based on isopropyl alcohol and water can be effective (70% ISO 30% H2O. Not on printed Cover Styl')
- Use only soft cloths or sponges to clean the vinyl (except glitter)
- If persistent stains are present it means that care and maintenance have not been performed correctly. In this case carry out a repair with patch (not guaranteed but effective and economical) or complete replacement of the vinyl;
- Don't use any organic-based cleaning product like ammonia or polish to clean vinyl

Non-contractual visuals and data, Cover Styl' reserves the right to change the composition of its films at any time. The rendition of the colours and finishes on the computer may vary according to the screen and not give a true representation of the true appearance. We therefore recommend you order a sample on line or contact us so that we can examine the finish that best adapts to your requirements. Due to the slight differences in colour in production runs, we advise you to purchase the amount you require in one go to avoid any difference in appearance in the execution of your Cover Styl' project.
